AQUADESIGN SUP

WELCOME TO OUR WORLD

For more than 3 decades, the Aquadesign brand has been sharing its passion for water sports with the world through high quality product lines. Since the beginning, our reputation has been based on the expertise of our teams and the quality of our products. Our range does not exclusively offer best-selling equipment, we have chosen to cover a very wide range of users in order to not only respond to the mass market. Instead, we focus all our efforts to offer the equipment that best suits our customers and always at the right price! And this, whether you are a rental professional, a competitor or simply a water sport enthusiast.

@AQUADESIGNCOMMUNITY

TECHNOLOGIES

LIGHT DROPSTITCH

LIGHT DROPSTITCH technology is a lightweight, reinforced premium construction. It is an innovative manufacturing technique designed for lightweight riders looking for more reactivity on the water. This technology provides more bounce and lightness for maximum fun on the water.

FUSION DROPSTITCH

To date, FUSION DROPSTITCH technology remains the best technique for manufacturing inflatable Stand Up Paddle Boards. Combined with Aquadesign's double Stringer, Fusion boards are among the most efficient and durable boards on the market. It is the technology that cannot be ignored by professionals and regular riders looking for performance.

SHELLFORCE

SHELLFORCE technology paddle boards are constructed to the highest standards in the industry and feature uniquely beautiful termination. The construction is 6x tougher than an hand-crafted epoxy boards and our production process allows for seamless construction and abrasion resistant out shell.

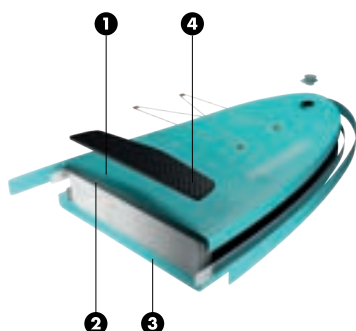

FOAM

The FOAM technology is made from high-density EPS foam core (20 kg/m³) with internal wood stringer reinforcement that allow strength and performance. to absorb falls, we use a layer of ultra comfortable soft foam finish on top of the epoxy resin protective layer.

MATERIALS

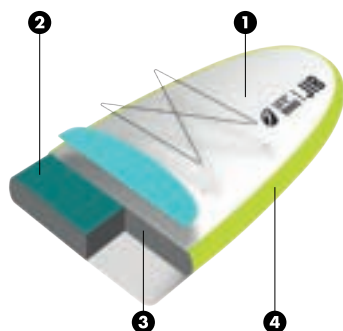

- 1 **1st STRINGER STRIP** Stiffer board and perfect rocker
- 2 **2nd STRINGER STRIP** Perfect control of the shape and twice more rigid
- 3 **DOUBLE RAIL** Additional waterproof protection, increasingly rigid structure
- 4 **EVA REPTILE FOAM** More comfort than diamond, better grip than flat

FUSION

- 1 **1st STRINGER STRIP** Stiffer board and perfect rocker
- 2 **2nd STRINGER STRIP** Perfect control of the shape and twice more rigid
- 3 **FIBER UNDERLAYER** Underlay manually glued to the PVC layers
- 4 **DOUBLE RAIL** Additional waterproof protection, increasingly rigid structure
- 5 **EVA REPTILE FOAM** More comfort than diamond, better grip than flat

- 1 **FINISHING COAT** Ultra-resistant thermoformed ABS finishing
- 2 **FIBERGLASS** 60 z fiberglass reinforcement
- 3 **EPS CORE FOAM** Optimum flotation High density 16kg/m³
- 4 **REINFORCED IMPACT RAIL** Double layer of fiberglass and high quality polymers

- 1 **COMFORT FOAM** Ultra-comfort foam to better absorb falls
- 2 **EPOXY PROTECTION** Epoxy resin protective layer
- 3 **WOOD STRINGER** Strength and performance
- 4 **CORE - EPS** High density EPS foam core (20 kg/m³)
- 5 **POLYETHYLENE SOLE HDPE** High density polyethylene sole
